INTRODUCTION :

Enter the world of

Vantage presents a novel array of bath fittings & accessories, of matchless quality. From conventional to unusual, from classical to contemporary, these are styled to suit every taste. Pamper your senses and imagination with the myriad products of Vantage. Enter the world of Vantage, make it your choice.

you live,
you are...

Established in October, 2001 Shri Raj Sanitations has carved for itself, an enviable niche as a successful manufacturer. Backed by world class technology and driven by dedicated team of dynamic professionals, the company manufactures superior quality luxury Bath accessories and faucets under its brand name VANTAGE the elegant way to personal freedom

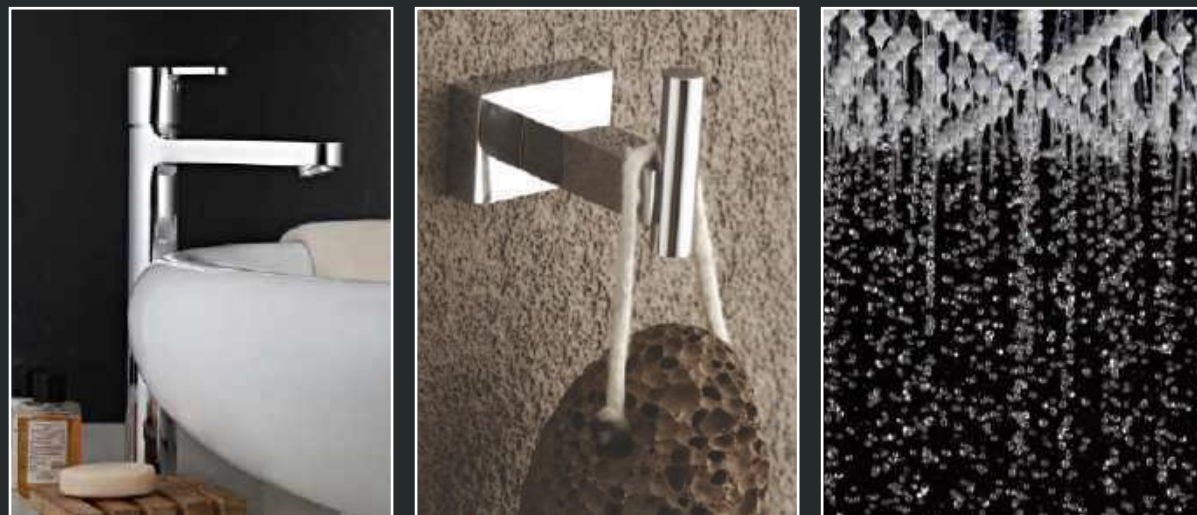

VANTAGE products are "a perfect combination of style and quality". As we believe excellence is a way of life, which is evident in the quality and design of every VANTAGE piece of art. **QUALITY:- is not an effort, BUT, Just The Way We Do Things.** Exquisitely shaped and incredibly well finished, using state-of-the-art intergrated manufacturing techniques, VANTAGE products are always a cut above the rest and compared to the Best.

Quality assurance, product reliability and testing are an integral part of the manufacturing process of VANTAGE products. Total in-house production capability gives them a confidence in terms of reduced production lead time, stringent quality controls and smoother execution of demand.

The company strives continuously towards further up-gradation, aided by an impressive dealer network, the Company is able to supply it's cost effective and innovative products range all over INDIA & ABROAD.

Access to the state-of-the-art technology should not be a luxury of the minority but rather the right of the majority. Delivering this right to every customer is our greatest challenge and our biggest reward.

On the threshold of bright future, we look ahead with confidence. Always ready to take on new challenges and to reach new horizons, in a persistent way to bring you the best.

A STEP AHEAD
IN PROVIDING
TOMORROW'S
SOLUTIONS.

CARE & CLEANING

Q. : How should I clean or maintain the finish on my faucet?

A. : Always blot dry any water from faucet surface. Allowing water to evaporate on the surface can lead to build up of mineral deposits. Cleaning with a damp non-abrasive sponge and buffing it dry with a clean soft cloth should help keep your product looking beautiful. To remove water spots, use warm water and a soft, damp cloth. Hard water stains may be removed using a 50/50 solution of white vinegar and water. Make certain that you rinse thoroughly with water afterward.

Q. : How do I keep the surface of my shower base clean?

A. : We recommend cleaning your shower base with a non-abrasive and/or non-caustic cleaner to prevent scratching or dulling of the finish.

Q. : How can I clean and/or remove mineral deposits from my showerhead?

A. : Wipe the face of the showerhead (rubber nubbins) to loosen and break away deposits. Learn more about Touch-clean. Non Touch-clean showerheads or stubborn deposits - unscrew the showerhead and soak it in a 50/50 vinegar and water solution for several hours. For stubborn deposits, rub with a toothbrush.

Cleaning Brass & Chrome Fixtures!

Brass fixtures look beautiful in a bathroom, but with them come a certain responsibility. While polishing brass might not be one of the more pleasurable aspects of cleaning a bathroom, it doesn't have to be tedious. To get your brass to shine, cut a lemon in half and dip it in some salt. Rub this on the brass and wipe with a clean cloth. If you don't have a lemon handy, make a paste from vinegar, salt and flour. Rub this into the brass and dry with a thick cotton cloth. Remember this cautionary bathroom cleaning tip: Before using a commercial brass cleaning product, test in a hidden area. Sometimes cleaning products will leave behind a film.

If not properly maintained, chrome fixtures can become dull and cloudy. After cleaning a bathroom, you want your chrome fixtures to sparkle! For blinding brilliance, make a paste of baking soda and dishwashing liquid. Apply this to your chrome fixtures and rub clean with a cloth. Warm vinegar will also make your bathroom shine.

Here's an additional bathroom cleaning tip: To clean stains from your bathroom chrome and tile, use baby oil! Wipe off with a cloth diaper for a lint free shine.

Q. : How to clean mirrors?

A. : Hurried morning grooming can mean a mess later if we're not careful. If your vanity mirror is dull from hairspray buildup try this bathroom cleaning tip: Washing the mirror with a solution of clarifying shampoo and water will eliminate the sticky haze caused by sprays. For a no-lint shine, wipe clean with a lint free cloth such as a cloth diaper or coffee filter.

A cloth dampened with rubbing alcohol will not only help to remove hairspray buildup from the mirrors but will also assist in cleaning bathroom tiles of sticky hair care products.

Q. : What cleaning products can cause damage to finishes?

A. : Always blot dry any water from faucet surface. Allowing water to evaporate on the surface can lead to build up of mineral deposits. Cleaning with a damp non-abrasive sponge and buffing it dry with a clean soft cloth should help keep your product looking beautiful. To remove water spots, use warm water and a soft, damp cloth. Hard water stains may be removed using a 50/50 solution of white vinegar and water. Make certain that you rinse thoroughly with water afterward.

Avoid using the following which can damage your finish:

- 1) Avoid industrial cleaners and abrasive cleaners, such as those used for toilet bowls, green Scotch-Brite heavy duty scrub sponges, Scrubbing Bubbles Bathroom Cleaner and Lysol Basin Tub, Soft Scrub, and Tile Cleaner.
- 2) Avoid products that state on the label that they remove tarnish and rust, and those containing hydrofluoric, hydrochloric and/or phosphoric acids and caustic agents.
- 3) Avoid harsh abrasives or polishes
- 4) Avoid bleach-based cleaners
